## Hansgrohe Shower Technology

**AIR Technology** Air-infused water makes all the difference when it comes to exceptional shower performance, plus it can also help save water by enhancing volume.

**Swivel Connectors** on all Hansgrohe handshower hoses prevent them from twisting and tangling in the shower. The connectors are featured on the end of the hose that connects to the handshower and on the end that connects to the holder/outlet.

**Rubit** The spray channels of Hansgrohe showers are made from silicone, an elastic material that actually repels limescale build-up. If limescale does appear, simply wipe it away with your fingertip or a washcloth and make limescale deposits a thing of the past.

**Kink-resistant** Extremely flexible, Hansgrohe shower hoses are ready to meet the daily demands of active showering. Additionally, because of a swiveling hose connection, Hansgrohe shower hoses will not kink or twist.

**Quiclean** incorporates tiny pins that extend through the spray channels, clearing any residual limescale or dirt every time the spray mode is changed. This automatic action keeps your shower in great working condition and prolongs the life of the products.

**Waterdimmer** The Aktiva A8 handshower also includes the Waterdimmer, a water saving feature that's built in the handle. An adjustable slider enables you to regulate the flow rate and save up to 50% on water, without sacrificing the performance of your shower.

**Sealed** No chance of leaks: Hansgrohe shower hoses and handshowers feature self-sealing gaskets, making them absolutely watertight and durable. Plus, with the self-sealing gaskets, there's no need for Teflon tape.

**Tension-proof** Hansgrohe shower hoses are all of high tensile strength offering maximum resilience even when used over long periods of time.

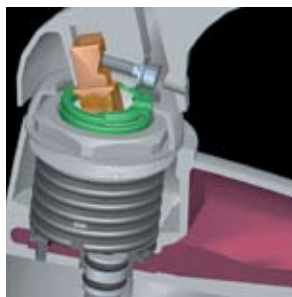

**Scratch-free** Due to their smooth, non-abrasive surface, Hansgrohe shower hoses will not scratch the bathtub or shower wall.

**Filter Basket** Found in handshower handles, the filter basket prevents even the smallest dirt particles from entering the shower interior. Compared with the filter basket seal, the filter basket catches considerably more dirt and can be cleaned easily.

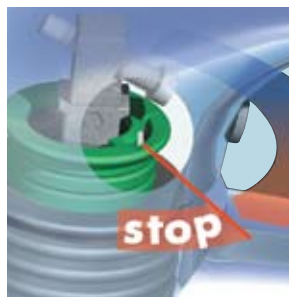

# Features and Innovations

## Hansgrohe Bath Technology

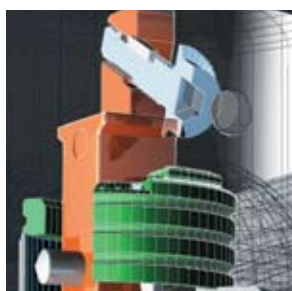

### Ceramic Cartridges

The M2 and M3 ceramic cartridge owes its durability and ultra-smooth operation to specially hardened synthetic materials. This cartridge enhances quality and performance by providing a lifetime of smooth, consistent, leak-free operation with a wide operating angle for easy temperature adjustment.

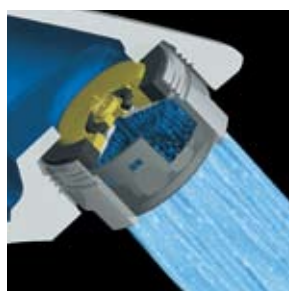

### Safety Function

The integrated hot water Safety Function will help you save energy by conserving hot water as well as help prevent scalding. With this feature, you can preset your highest temperature setting.

### Boltic Lever Lock

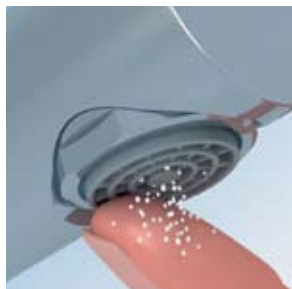

The Boltic Lever Lock has three times the bearing surface of conventional fixing systems to prevent wear that comes from regular use.

### Water Dimmer

The Waterdimmer feature ensures constant water use and allows 2.2 gallons of water per minute, resulting in lower energy costs and water consumption.

## Hansgrohe Kitchen Technology

### Rubit Aerator

It is virtually impossible for limescale deposits to take hold on the elastic silicon screen of the Rubit aerator. Should deposits appear, you can easily rub them off with your finger.

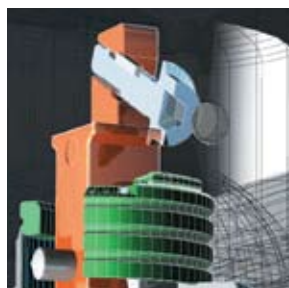

### Simple installation

Flexible connection hoses make it easier to install the faucet.

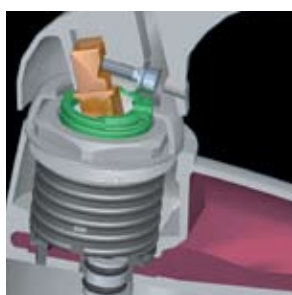

### Ceramic Disc Valves (3 and 4-Hole)

Hansgrohe incorporates ceramic disc technology in its three- and four-hole faucets. This feature enhances quality and performance by providing a lifetime of smooth, leak-free operation.

### Boltic Lever Lock

The Boltic Lever Lock has three times the bearing surface of conventional fixing systems to prevent wear that comes from regular use.

### Ceramic Cartridges

The M2 and M3 ceramic cartridge owes its durability and ultra-smooth operation to specially hardened synthetic materials. This cartridge enhances quality and performance by providing a lifetime of smooth, consistent, leak-free operation with a wide operating angle for easy temperature adjustment.

## Hansgrohe Kitchen Technology (continued)

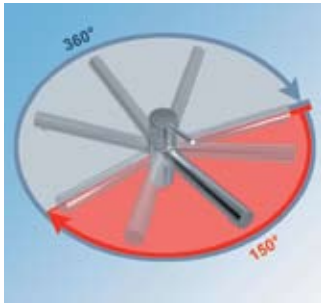

### Advantage of Faucets with Pull-Out Spray

#### **Pull-Out Handsprays**

Choose between one or two-spray modes on kitchen faucets with the pull-out feature. With two-spray versions, it's easy to switch between full and needle sprays in an instant. Pull-out handsprays also feature long, counter-weighted hoses that allow you to cover a much wider area around the sink. The durable nylon/fabric hoses are made to last and create quiet, smooth operation

### Product-Specific Features

#### **Swivel Area**

The faucets offer you either a swivel area of 150 degrees or the all-round freedom of movement with an amazing 360-degree swivel area.

#### **Extra High Spout**

Faucets with high spouts offer incredible room for movement and are ideal for filling pots.

#### **Variable Handle Position**

The handle can be positioned on the right or the left to suit personal preference.

#### **Vertical Starting Position**

The vertical starting position of the handle permits installation even with very limited backsplash area. Plus, the faucets only run cold water when the handle is fully open, preventing accidental scalding.

#### **Lift Feature**

The lift feature allows you to simply lift the faucet and fold down, making it more practical for cleaning around the base or installing in front of a hinged window.

**Lifelong finishes.** Hansgrohe employs a Physical Vapor Deposition (PVD) process for special finishes to ensure finish durability, longevity and beauty. PVD finishes resist corrosion, tarnish, scuffs, peeling, permanent scratches and flaking. The finishes bond to the products on a molecular level in a vacuum chamber, creating a thin though highly impervious finish. With this advanced technology, products retain their original beauty for years to come.

### Surface Finishes

**-000/-001** Chrome

**-620/-621** Oil Rubbed Bronze

**-800/-801** Stainless Steel

**-820/-821** Brushed Nickel

**-830/-831** Polished Nickel

**-930/-931** Polished Brass

Hansgrohe places the highest priority on maintaining a safe work setting for employees, protecting our environment and manufacturing top-quality products. As a result of our efforts, Hansgrohe earned three international certifications: ISO 9001:2000 (Quality Management System), **ISO 14001 (Environmental Management System)** and OHSAS 18001 (Safety and Health Management System). Hansgrohe is among the few companies in all industries in the United States to achieve all three certifications, highlighting our active commitment to world-class operations.
